Amendments to the Claims:

The listing of the claims will replace all the prior versions, and listings, of claims in the applications:

Listing of Claims:

- 1-5 (Canceled).
- 6 (Withdrawn).
- 7 (Canceled).
- 8 (Currently amended) A package material comprising
- a paperboard substrate,
- a primer applied to said substrate, wherein the primer is ammonium catalyzed, self-cross linking copolymer of ethylene-vinyl acetate with N-methylol acryl amide functional groups attached to a polymer backbone wherein said primer has a coat weight of 0.1-0.5 lbs./ream,
- a polyester coating applied to said primed substrate, said coating having a coat weight of as low as at least 12 lbs./ream.
- 9 (Currently amended) The packaging material of claim 2, 8 wherein said coating is polyethylene terephthalate.

Claims 10-17 (Canceled).

- 18 (Withdrawn).
- 19 (Previously amended) The method of forming a packaging material comprising providing a paperboard substrate,

applying a primer to said substrate, and

applying a polyester coating to said primed substrate with a coat weight of up to 12 lbs/ream, wherein said polyester coating is extruded onto said substrate at a line speed of 800-1200 feet per minute.

- 20 (Previously presented) The method of claim 19, wherein said coating is polyethylene terephthalate.
- 21 (Previously presented) The method of claim 19, wherein said primer is an ammonium catalyzed, self- cross linking copolymer of ethylene-vinyl acetate with N-methylol acryl amide functional group attached to a polymer backbone.
- 22. (New) The method of claim 19 further comprising flame treating said substrate.
- 23. (New) The method of claim 19 further comprising water misting said substrate.
- 24. (New) The method of claim 19 wherein water is misted at 0.01 to 0.1 lbs/ream.
- 25. (New) The method of claim 19 further comprising a clay coating on said substrate.
- 26. (New) The method of claim 19 wherein said polyester coating has a coat weight of 10 lbs/ream.
- 27. (New) The method of claim 19 wherein said coat weight is 10 lbs/ream.
- 28. (New) The method of claim 19 wherein said primer is epoxy modified polyolefin tie resins.
- 29. (New) The packaging material of claim 8, wherein said paperboard substrate is clay coated.
